DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-31 and 38-40, drawn to a method of determining that a web page has an representation of a product and providing product information, classified in class 705, subclass 27

II. Claims 32-37 and 41-44, drawn to receiving identification information of products on a page, classified in class 705, subclass 26.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method of providing product information wherein the content of the web pages is inferred rather than explicitly stated by a user. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
